To Whom It May Concern,

I am writing to confirm that we are working at the Princeton University Office of Technology Licensing with Christine Angel McLaren de Riordan to fulfill the optimum IP strategy to best protect her portfolio of Seeables inventions, first developed whilst she was a student here at the University. It is fascinating and complex work, and we are invested in helping her secure funding so that the work may reach its full commercial potential. In developing this work, she is collaborating closely with her PhD co-advisers, Daniel Garber, the A. Watson Armour III University Professor here at Princeton and Alain Connes, Chair, Analysis and Geometry, College de France, Paris, France.

Please don't hesitate to get in contact if we can provide any further information.

Sincerely,

Anthony Williams
